

THE HOUSE MOBILE ESCAPE COVID Procedures

We practice more stringent cleaning procedures

After guests use any gear or equipment in the escape room, we make sure to sanitize everything before and after each use. We can take this a step further upon request and add a plastic covering to all major touching surfaces and guests can unwrap it themselves to show they've been cleaned.

In addition, here are some additional best practices we adopted.

- Upon arrival we take each guests temperature with contactless thermometers.
- Wipe down all public surfaces multiple times per day.
- Hand sanitizer available before and after games.
- We encourage all employees and guests to wear facemasks.
- We encourage all guests to remain 6 ft apart, however this is difficult to accomplish in the mobile rooms.

We are currently monitoring the CDC best practices and will evolve our practices to match or exceed the CDC recommendations.
